

A paper that will
leave plastic
green with envy.

Introducing our innovative, paper-based, plastic-free packaging solution that reduces plastic waste.

ECOVA, by NEXXA, is an efficient and eco-friendly heat seal that uses patented PAPERLOCK technology to resemble and replace conventional plastic while being plastic-free. Our curbside recyclable, heat-sealable paper overwrap is the perfect drop-in solution, designed specifically for your vertical and horizontal form fill machines.

WHY ECOVA?

Addresses waste & plastic reduction goals, also supporting EPR objectives.

Heat sealable paper eliminating the need for added adhesives.

100% paper with plastic like performance.

Curbside Recyclable, just like paper!

Transparent Sustainable Certifications.

FOOD PACKAGING

With eco-friendly heat seal technology, ECOVA provides food packaging solutions in multiple applications, resulting in curbside recyclability for minimum waste. Great for: Heat sealed paper pouch bags for rice, potatoes, frozen fruit/ vegetables and other applications.

PAPER PRODUCTS

Being a 100% paper product, ECOVA is the perfect solution for packaging paper products – making the entire purchase recyclable and promoting your brand's stance on the environment. Great for: Paper Towels, Bathroom Tissue, Napkins and other paper products.

At NEXXA, we partner with customers to develop a custom, plastic-free solution that champions their brand in the fast growing, eco-friendly market. Visit NEXXAPRINT.COM for more information or contact us below.
